MAIBEC ALUMINUM PANELS

Our aluminum panels, specifically designed for exterior applications, have been tested and proven to be durable, weather and wear-resistant, easy to maintain, and quick to install!

Electrostatic Powder Coating

Using powder coating instead of traditional paints allows us to create higher quality panels that are also environmentally friendly thanks to our eco-friendly, chrome-free process. Available in AAMA 2604 and AAMA 2605 standards.

On-Site Delivery

Simple, fast and without intermediaries! With our direct delivery service, you can choose exactly when you wish to receive your custom-cut panels, all pre-sorted and identified by section (wall/floor), straight to your building site.
