

# MAIBEC ALUMINUM PANELS

Maibec aluminum architectural panels combine strength and contemporary elegance for durable, refined façades. Made from architectural-grade aluminum with a high-performance finish, they provide excellent resistance to weather and corrosion. Their wide range of profiles and finishes offers the freedom to bring bold design visions to life in commercial, institutional, and high-end residential projects.

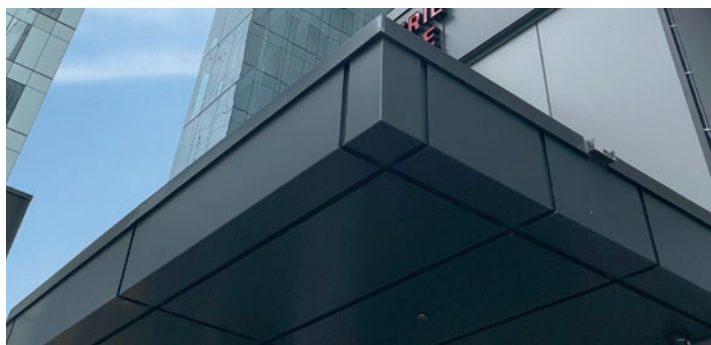

## Available Colours and Finishes

Maibec offers both powder and liquid coating options to bring your design vision to life. Our fully managed powder coating process is free of solvents, VOCs and chromium, meeting all criteria outlined in AAMA 2604 and 2605 standards. For anodized effects, special finishes, or precise colour matching, our partners can customize both powder and liquid coatings using the industry's most recognized colour charts to achieve any desired look.

## Tailored assistance

From the start of your project, you will be assigned a dedicated contact who will stay with you throughout our collaboration. This ensures a strong, personalized relationship, allowing us to fully understand your needs and provide timely, precise answers to all your questions.

## Featured Products

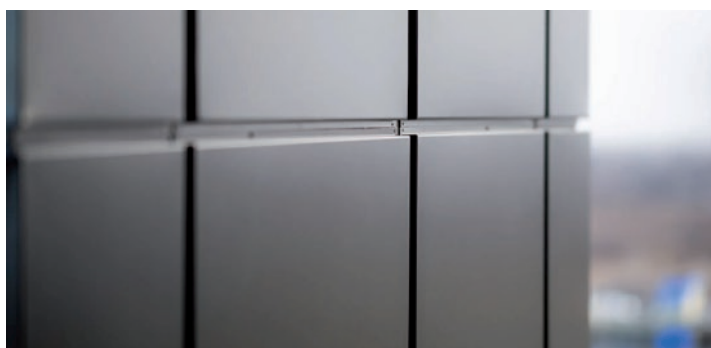

### MAP-01 — ALUMINUM PLATE OVER EXTRUSION PANEL

MAP-01 is an architectural panel made out of durable premium aluminum and features a floating appearance thanks to its concealed fasteners.

### MAP-02 — ALUMINUM FOLDED PANEL WITH CLIP SYSTEM

Boasting the reliability of durable construction, the MAP-02 clip system with concealed fastener is the perfect choice for intricate design. With brackets engineered for thermal expansion, it stands out as the ultimate go-to solution.

### MAP-03 — ALUMINUM BOX-STYLE PANEL

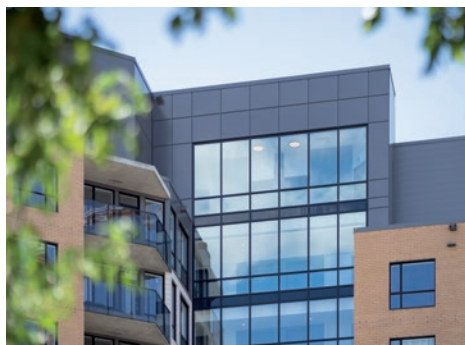

Folded from 3.2mm or 2mm sheets, the MAP-03 is renowned for its box effect. Fast and easy to install, it's the smart choice for budget-conscious projects.

### MAP-12 and MAP-16 — FOLDED ALUMINUM BOARDS

The MAP-12 and MAP-16 architectural panels can be installed vertically or horizontally with an interlocking system for easy installation. Produced on a state-of-the-art robotic line, they are available in multiple sizes with an optional pre-drilling feature, giving you the freedom to design with confidence.

## Past Projects

Complexe Città, Saint-Leonard

Magellan Condos, Brossard

Fire Station 12, Quebec
